projects

17 000 000 +

lines of code

About us

We make complex web services, aggregators, marketplaces, exchanges, automated rendering farms, ERP, business automation and chat bots.

Our founders are mentors of business incubator Ingria (top 10 UBI Global).

We cooperate with private foreign investors, cooperate with private venture funds, Japanese integrators, accelerators and trading houses.

As an external team we developed for Toyota Tsusho Corporation, Yandex.Taxi, MTS, Uber.

1,5 mln \$ – the biggest amount of investment to the startup we developed, SmartSchoolPro

How we work: SCRUM and Trello

Scrum is a project management methodology that uses two-week iterations - sprints

Trello is a Kanban-board task accounting system. Trello is simple and easy to master

Control

Transparent operation

Always in touch

easy to add
and edit tasks

Process
systematisation

Results every two
weeks

Following
the roadmap

Store and share project
materials

Always in touch

We are online in projects chats and twice a week we hold video-conversations with client to discuss following:

1

What has been done yesterday?

2

What is in progress?

3

What blockers do we have?

Development of **complex web services** is our major service

We make complex web services, aggregators, marketplaces, exchanges, automated rendering farm, ERP, business automation and chat bots.

We work with startups:
technical consulting, web-development, complex project vision, digital marketing

Other services

Mobile development

Consulting

Technical assignment

UX/UI

Logo design

Project evaluation

Project support

Negotiation aid

Team hiring

Digital marketing

SMM

Payment system

Work on the project is carried out by short iterations - sprints

1

First we estimate the amount of sprint tasks in working hours

2

Then we calculate the cost of the work for one sprint

3

Finally, we take prepayment and start the work

Nonagile (waterfall) projects are estimated with individual conditions

Why so?

- Efficient collaboration via SCRUM
- Payment by 2-week sprints for the work done
- It is easy to track progress in Trello daily
- No big prepayments
- Minimal financial risks on both sides

FAQ

- ✓ Yes, we work under contract
- ✓ Yes, we sign NDA
- ✓ Yes, all the tasks are in Trello
- ✓ Yes, we can share feedback and reviews
- ✓ Yes, we can support the project
- ✓ Yes, we have designers

Technology stack

Server:

Django,
FastAPI,
Python,
Nginx,
Traefik

DevOps:

Gitlab CI/CD,
Docker,
Portainer

Background

Tasks:

Celery,
RabbitMQ

Frontend:

Vue.Js,
JavaScript,
Webpack

Real-Time:

Centrifuge,
WebSockets,
WebRTC

API Gateway:

APISIX

Monitoring:

Sentry.Io,
Datadog

Hosting:

YandexCloud,
Selectel,
VDS.Selectel,
DigitalOcean,
Vscale,
Hetzner

Database:

PostgreSQL,
Redis,
Pgouncer

Mobile:

Flutter.Dev

Auth:

Keycloak

Tests:

Postman,
Selenium,
Schemathesis,
Pytest
