Web and mobile development

Wisesoft.tech is for future

Core business - complex web development.
Also we work with UX/UI and digital marketing.

About us

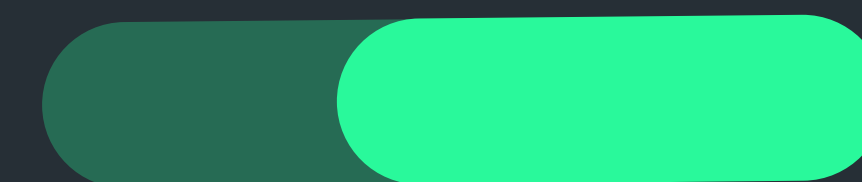

Founders of NeeKidam Dmitry Lyubimtsev and Kirill Marchenko - mentors of business incubator Ingria.

We make complex web services, aggregators, marketplaces, exchanges, automated rendering farm, ERP, business automation and chat bots.

We give technical expertise to startups Working on the stack: backend - Python/Django, frontend Vue.js, mobile development - Flutter.

Web projects

SMARTSCHOOLPRO

Smartschool is a startup in education and children's health tracks. It is already in use in kindergartens and has sales.

FORRENDER

Automation of rendering farm operations

ONCONA

Oncona is a multifunctional medical system, which provides remote daily questioning of the patient. System is a cloud service.

CUSTOMORROW

Online store, exchange of artists of your ideas, production of unique things with shipping around the world. In active development.

JATA

An exchange for advertising on cars. On cars, freight and even on buses and "buses". With the help of this exchange you can promote your brand. any car owner can earn. To do this, the driver needs to place promotional stickers on the body of his car and just drive along their usual routes.

SMSLIKE

Service for receiving SMS messages online. In the service user rents a phone number for the possibility of registration in all social networks, Avito, WhatsApp, Viber, Facebook.

CHA

This is the e-commerce platform developed for the Central House Artist (CHA) to sell art. CHA - the largest organization in Russia which unites the most significant native artists.

GROOZGO

Aggregator in freight transport. Service directly connects cargo owners and carriers, removing excess intermediaries. Skolkovo Foundation Resident.

MUSICAT

The service allows the use of high-quality copyright licensed music under a non-exclusive license for individuals and legal entities in their projects.

SOCIATE

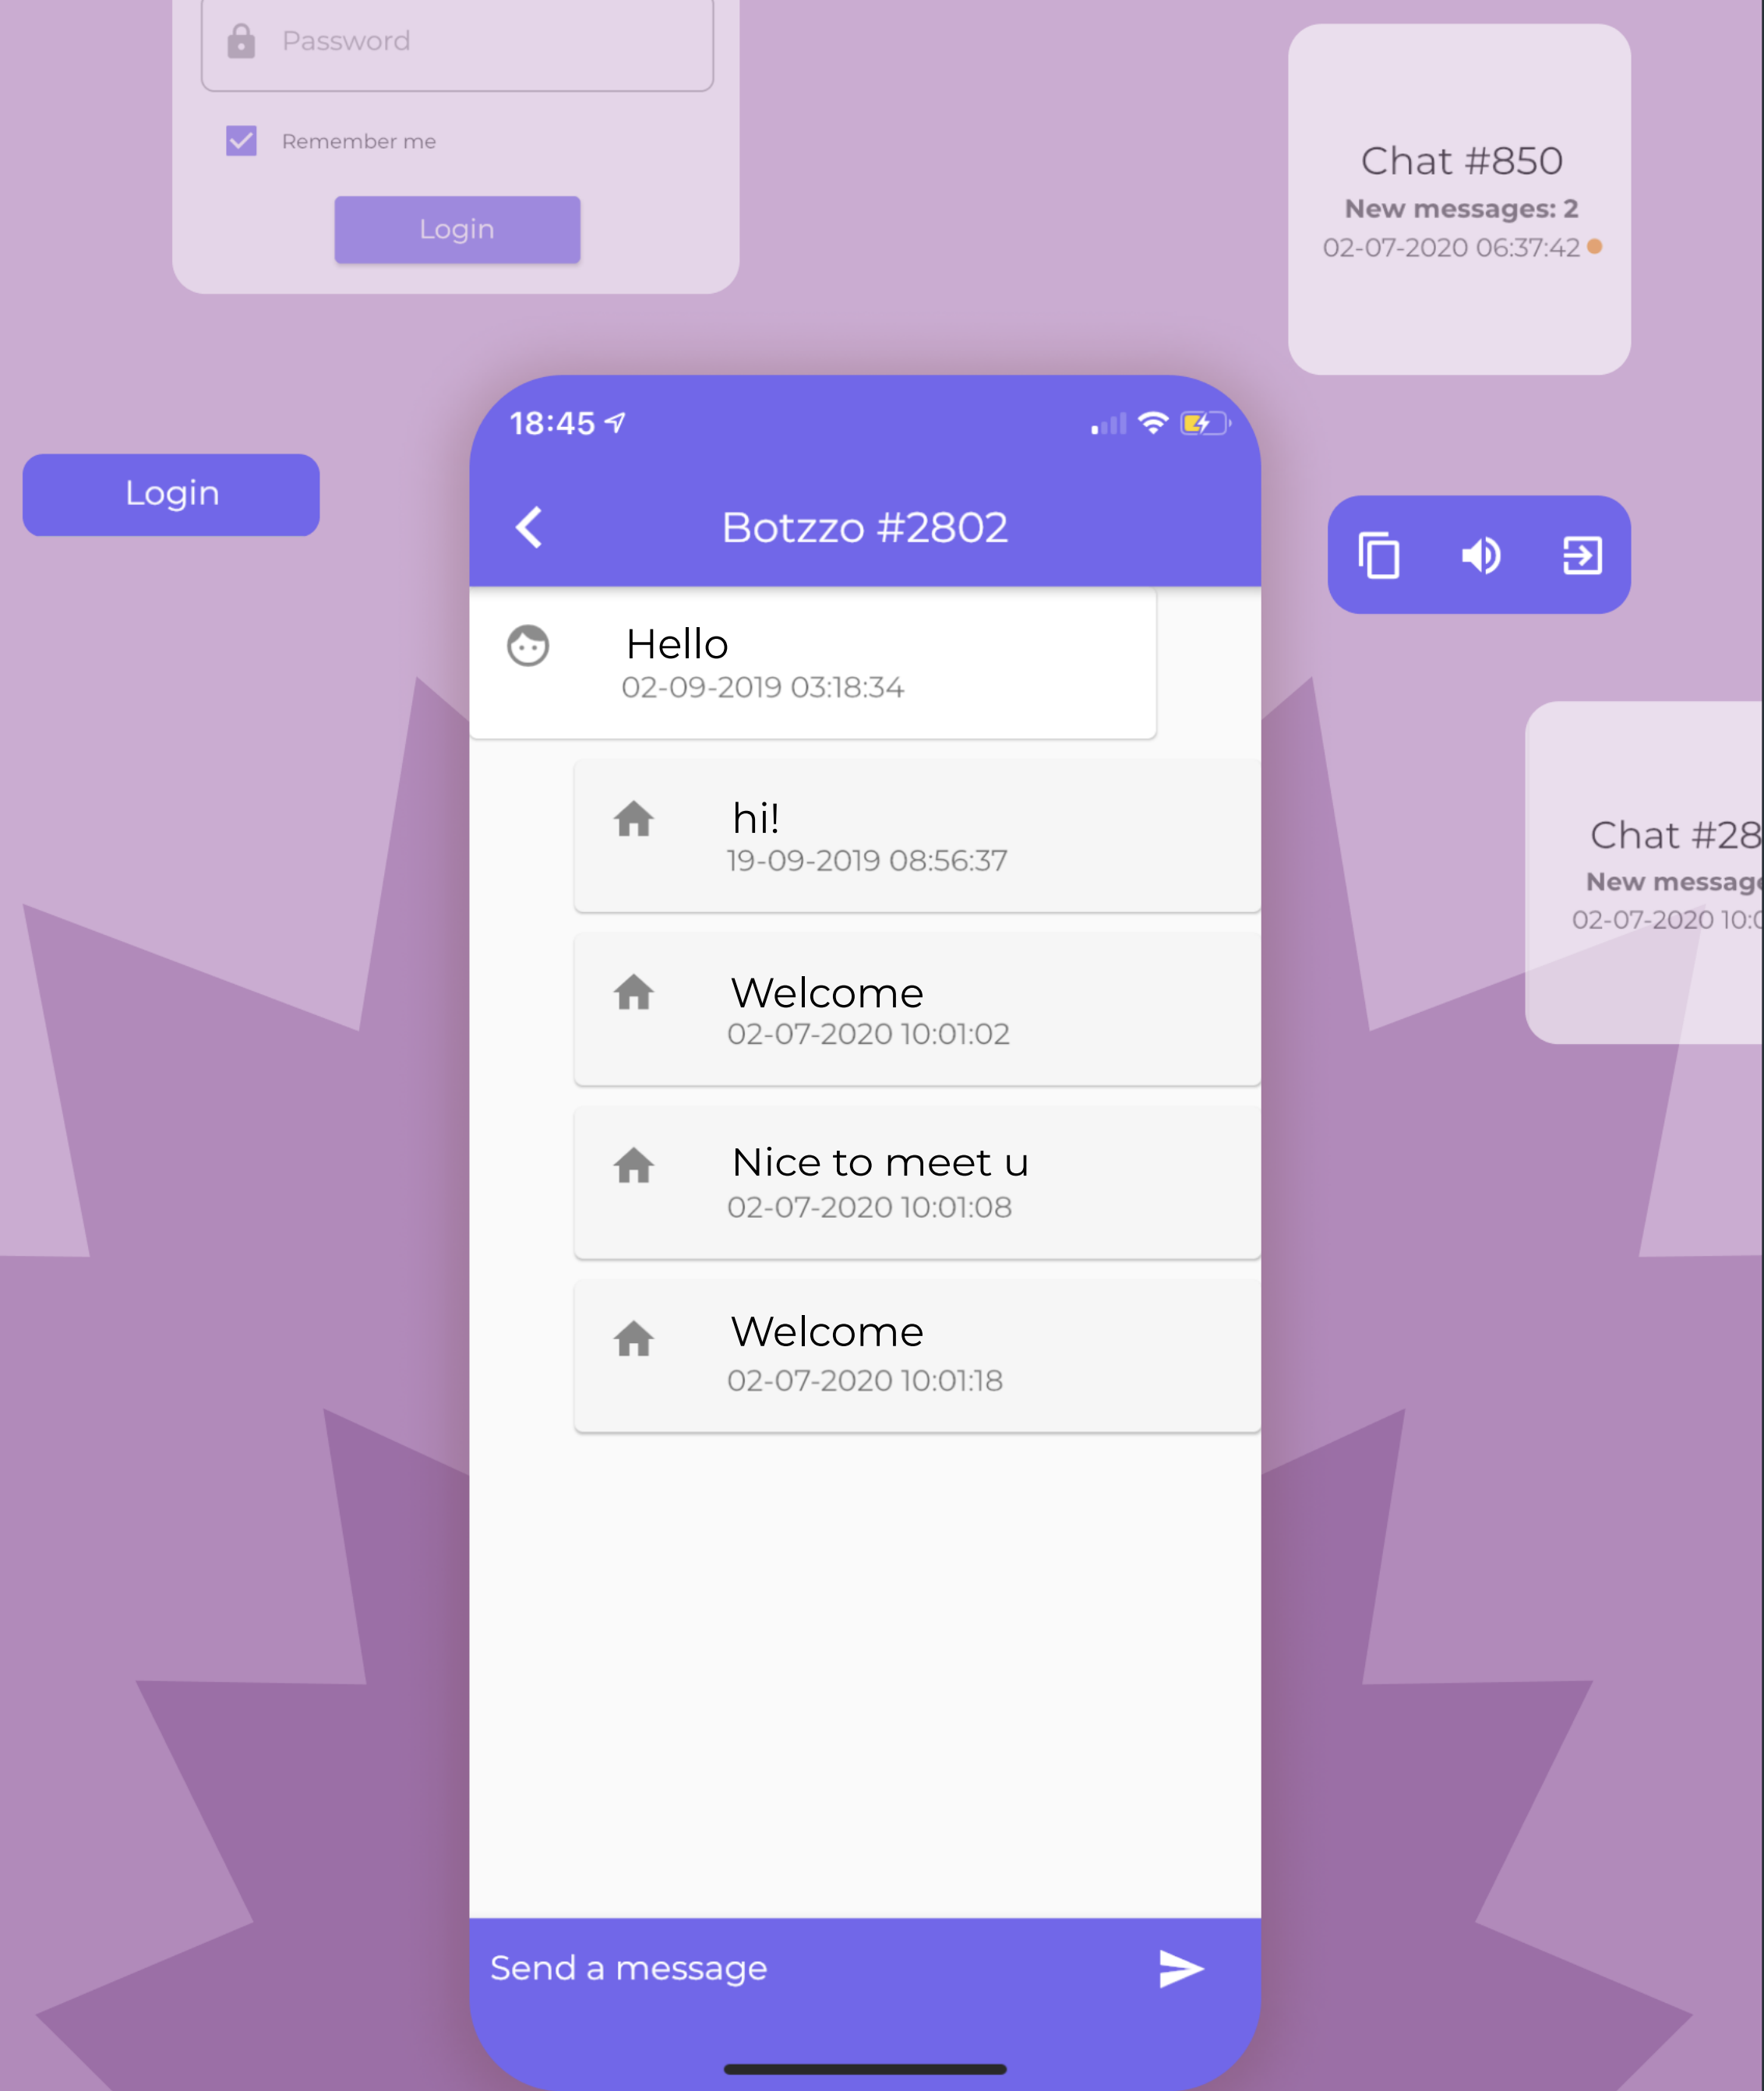

One of the largest exchanges for advertising on social networks.

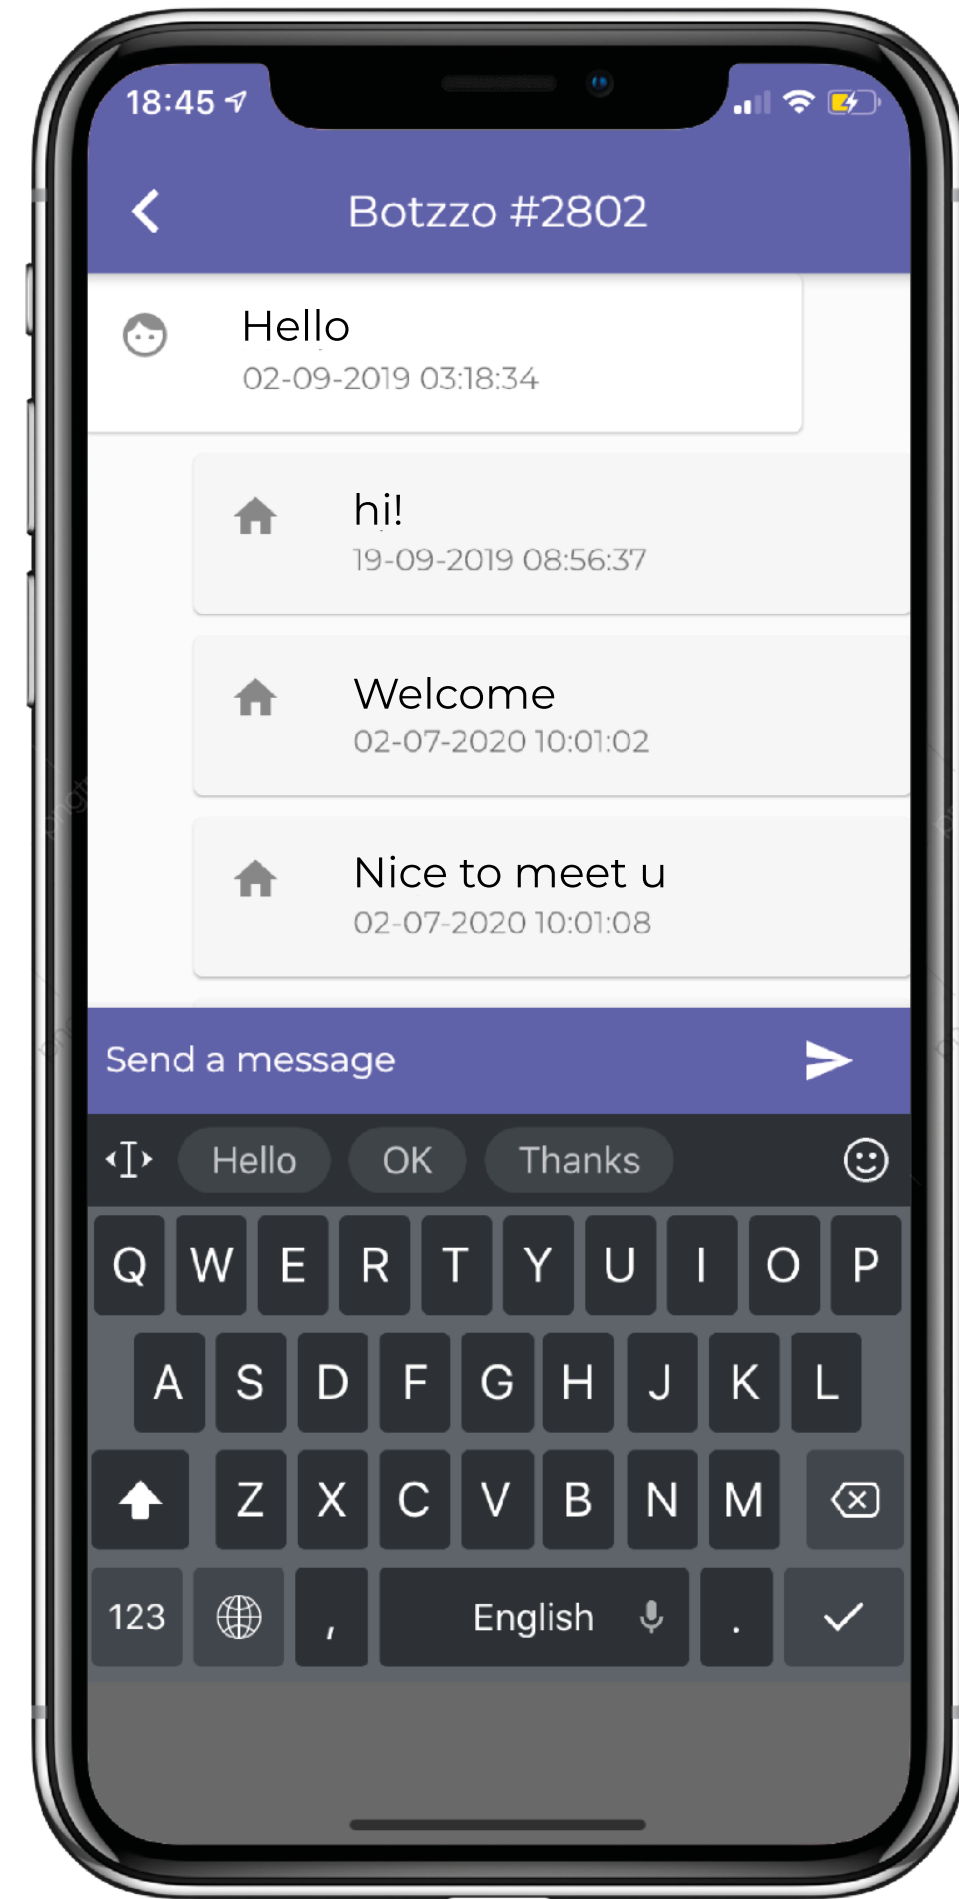

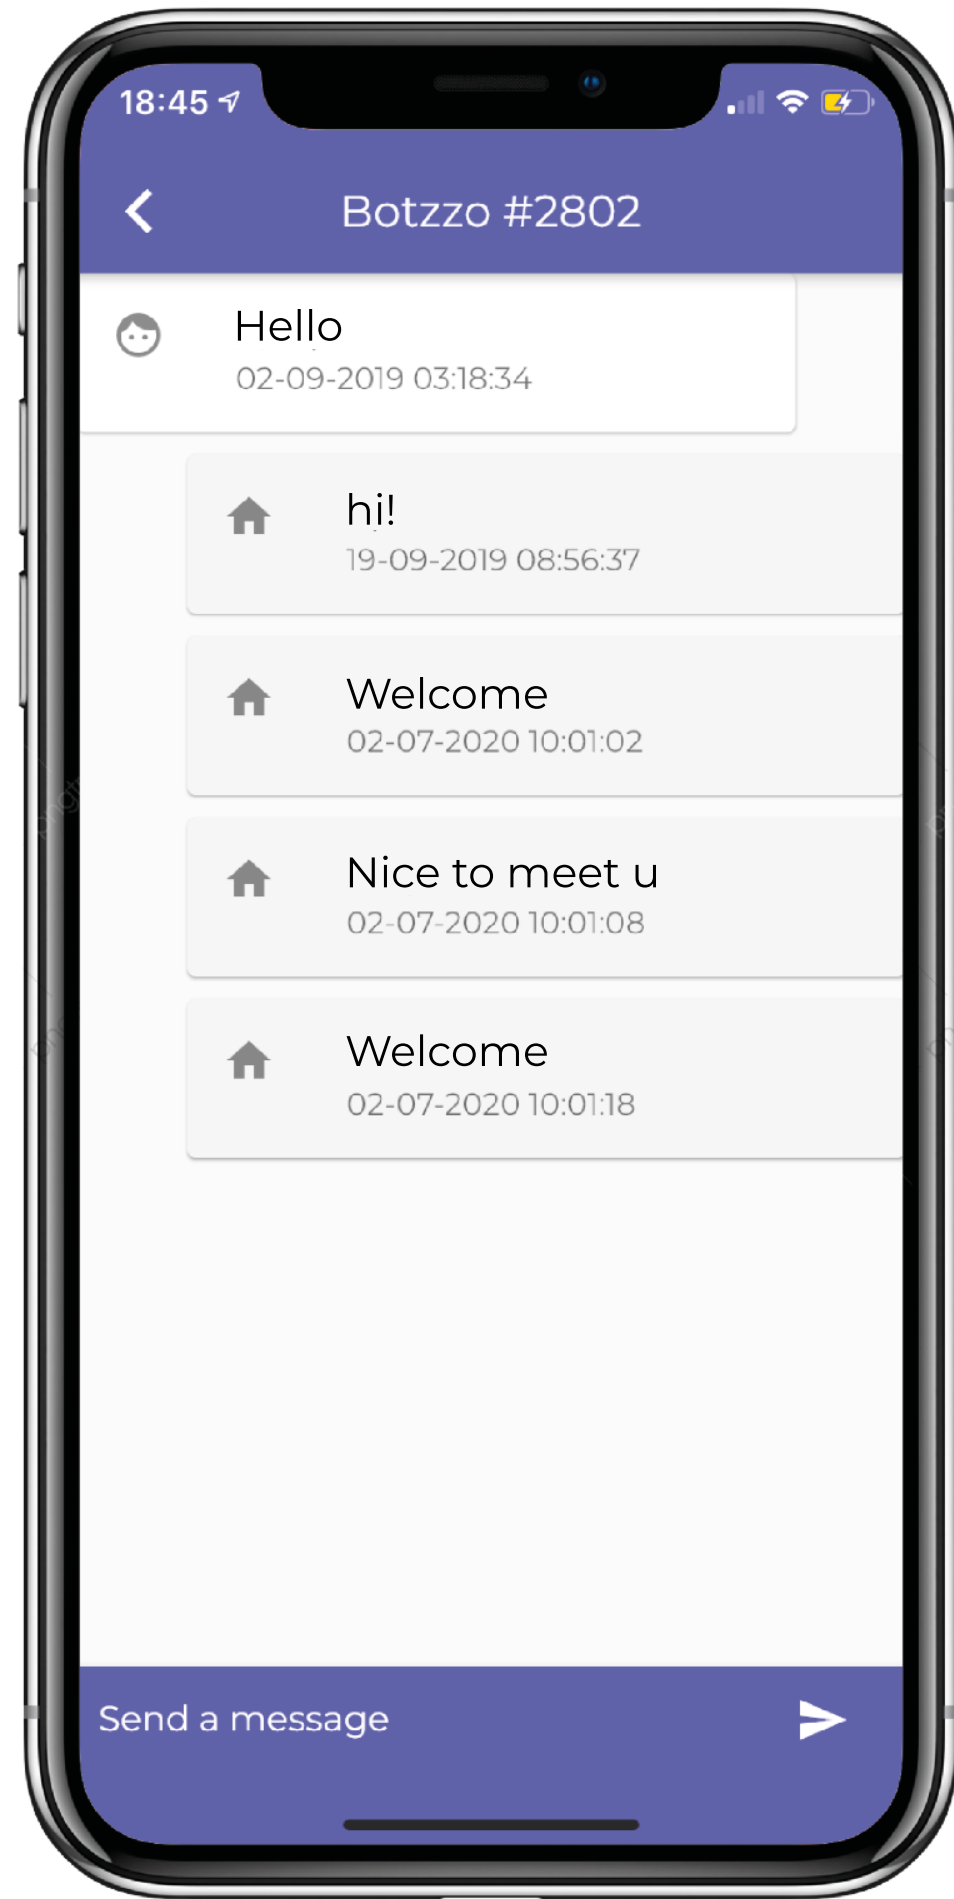

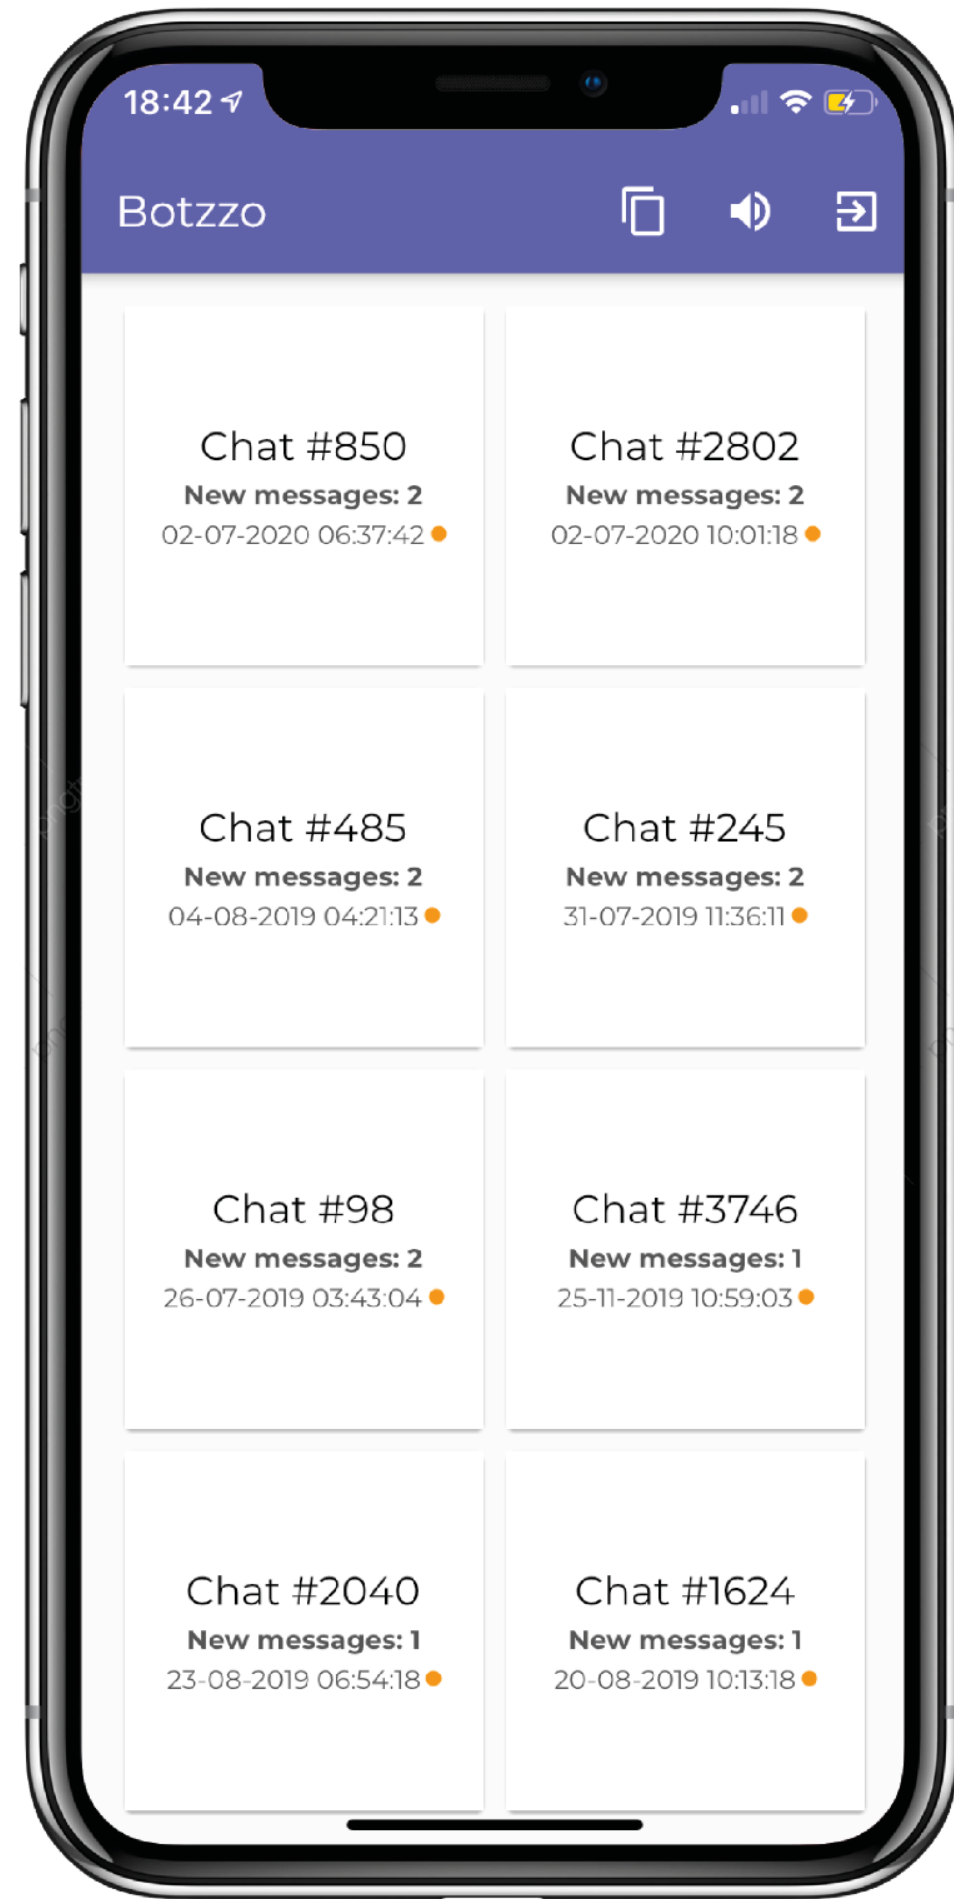

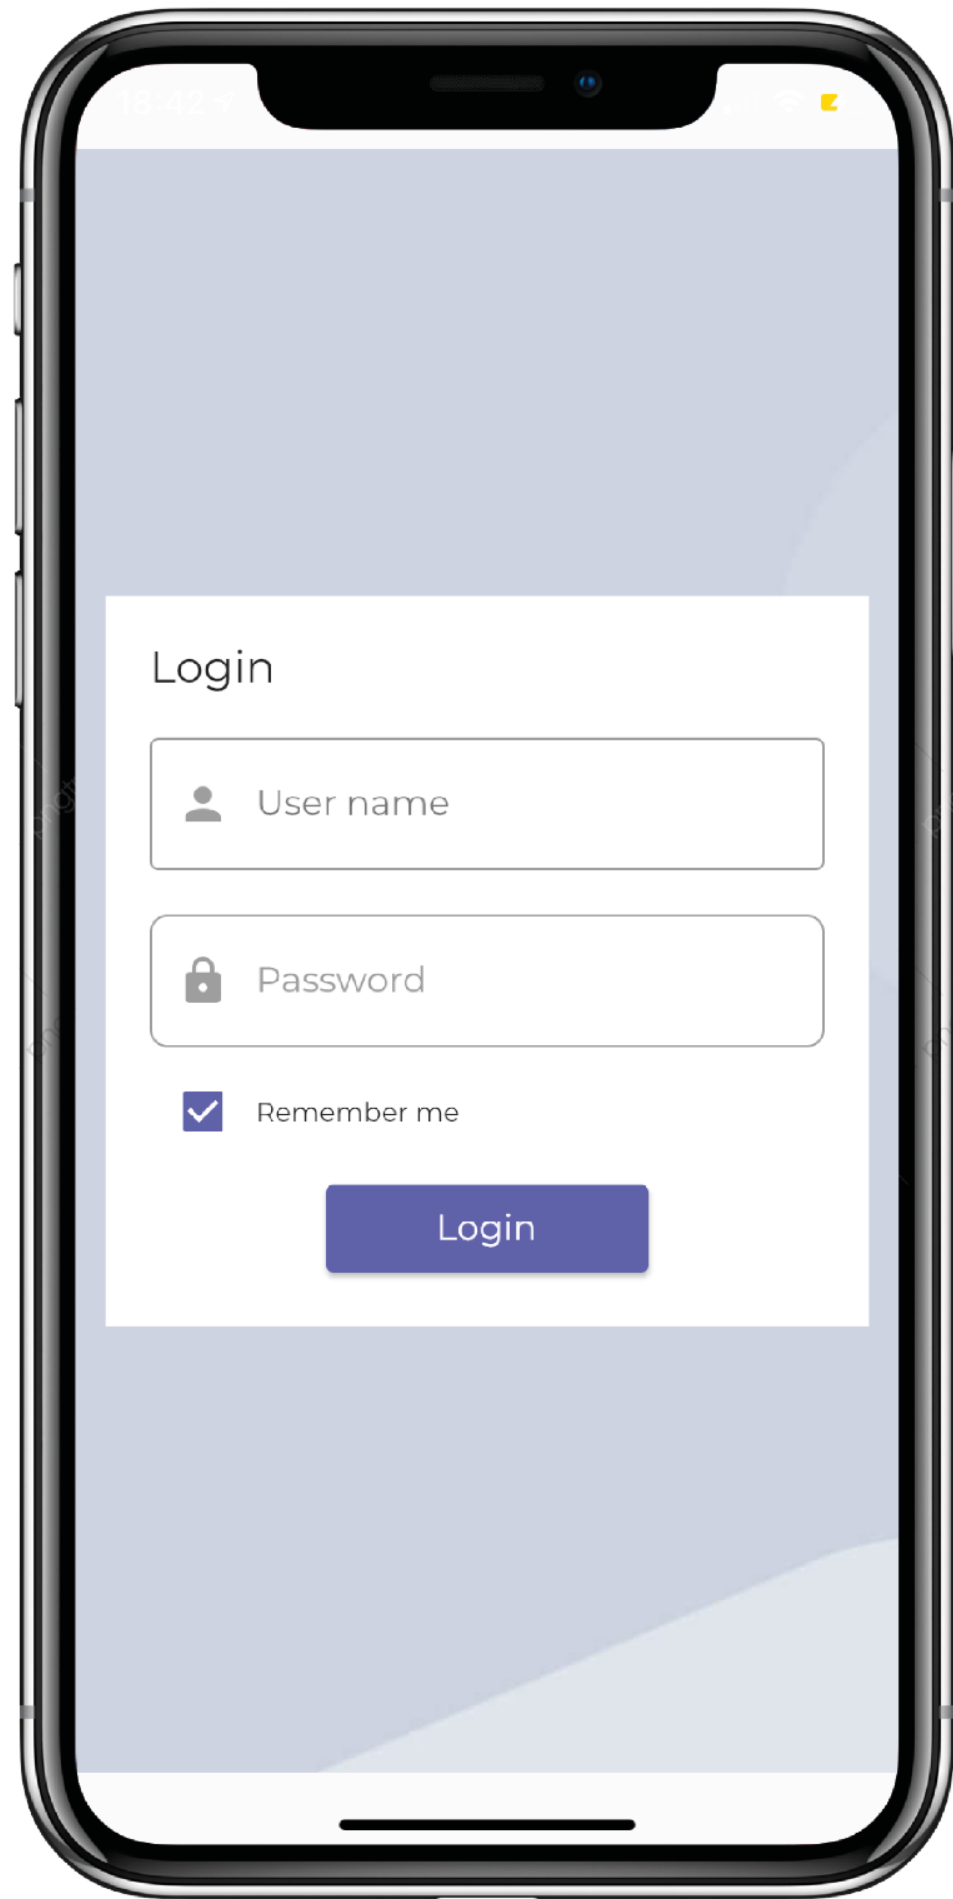

Mobile projects

BOTTZO

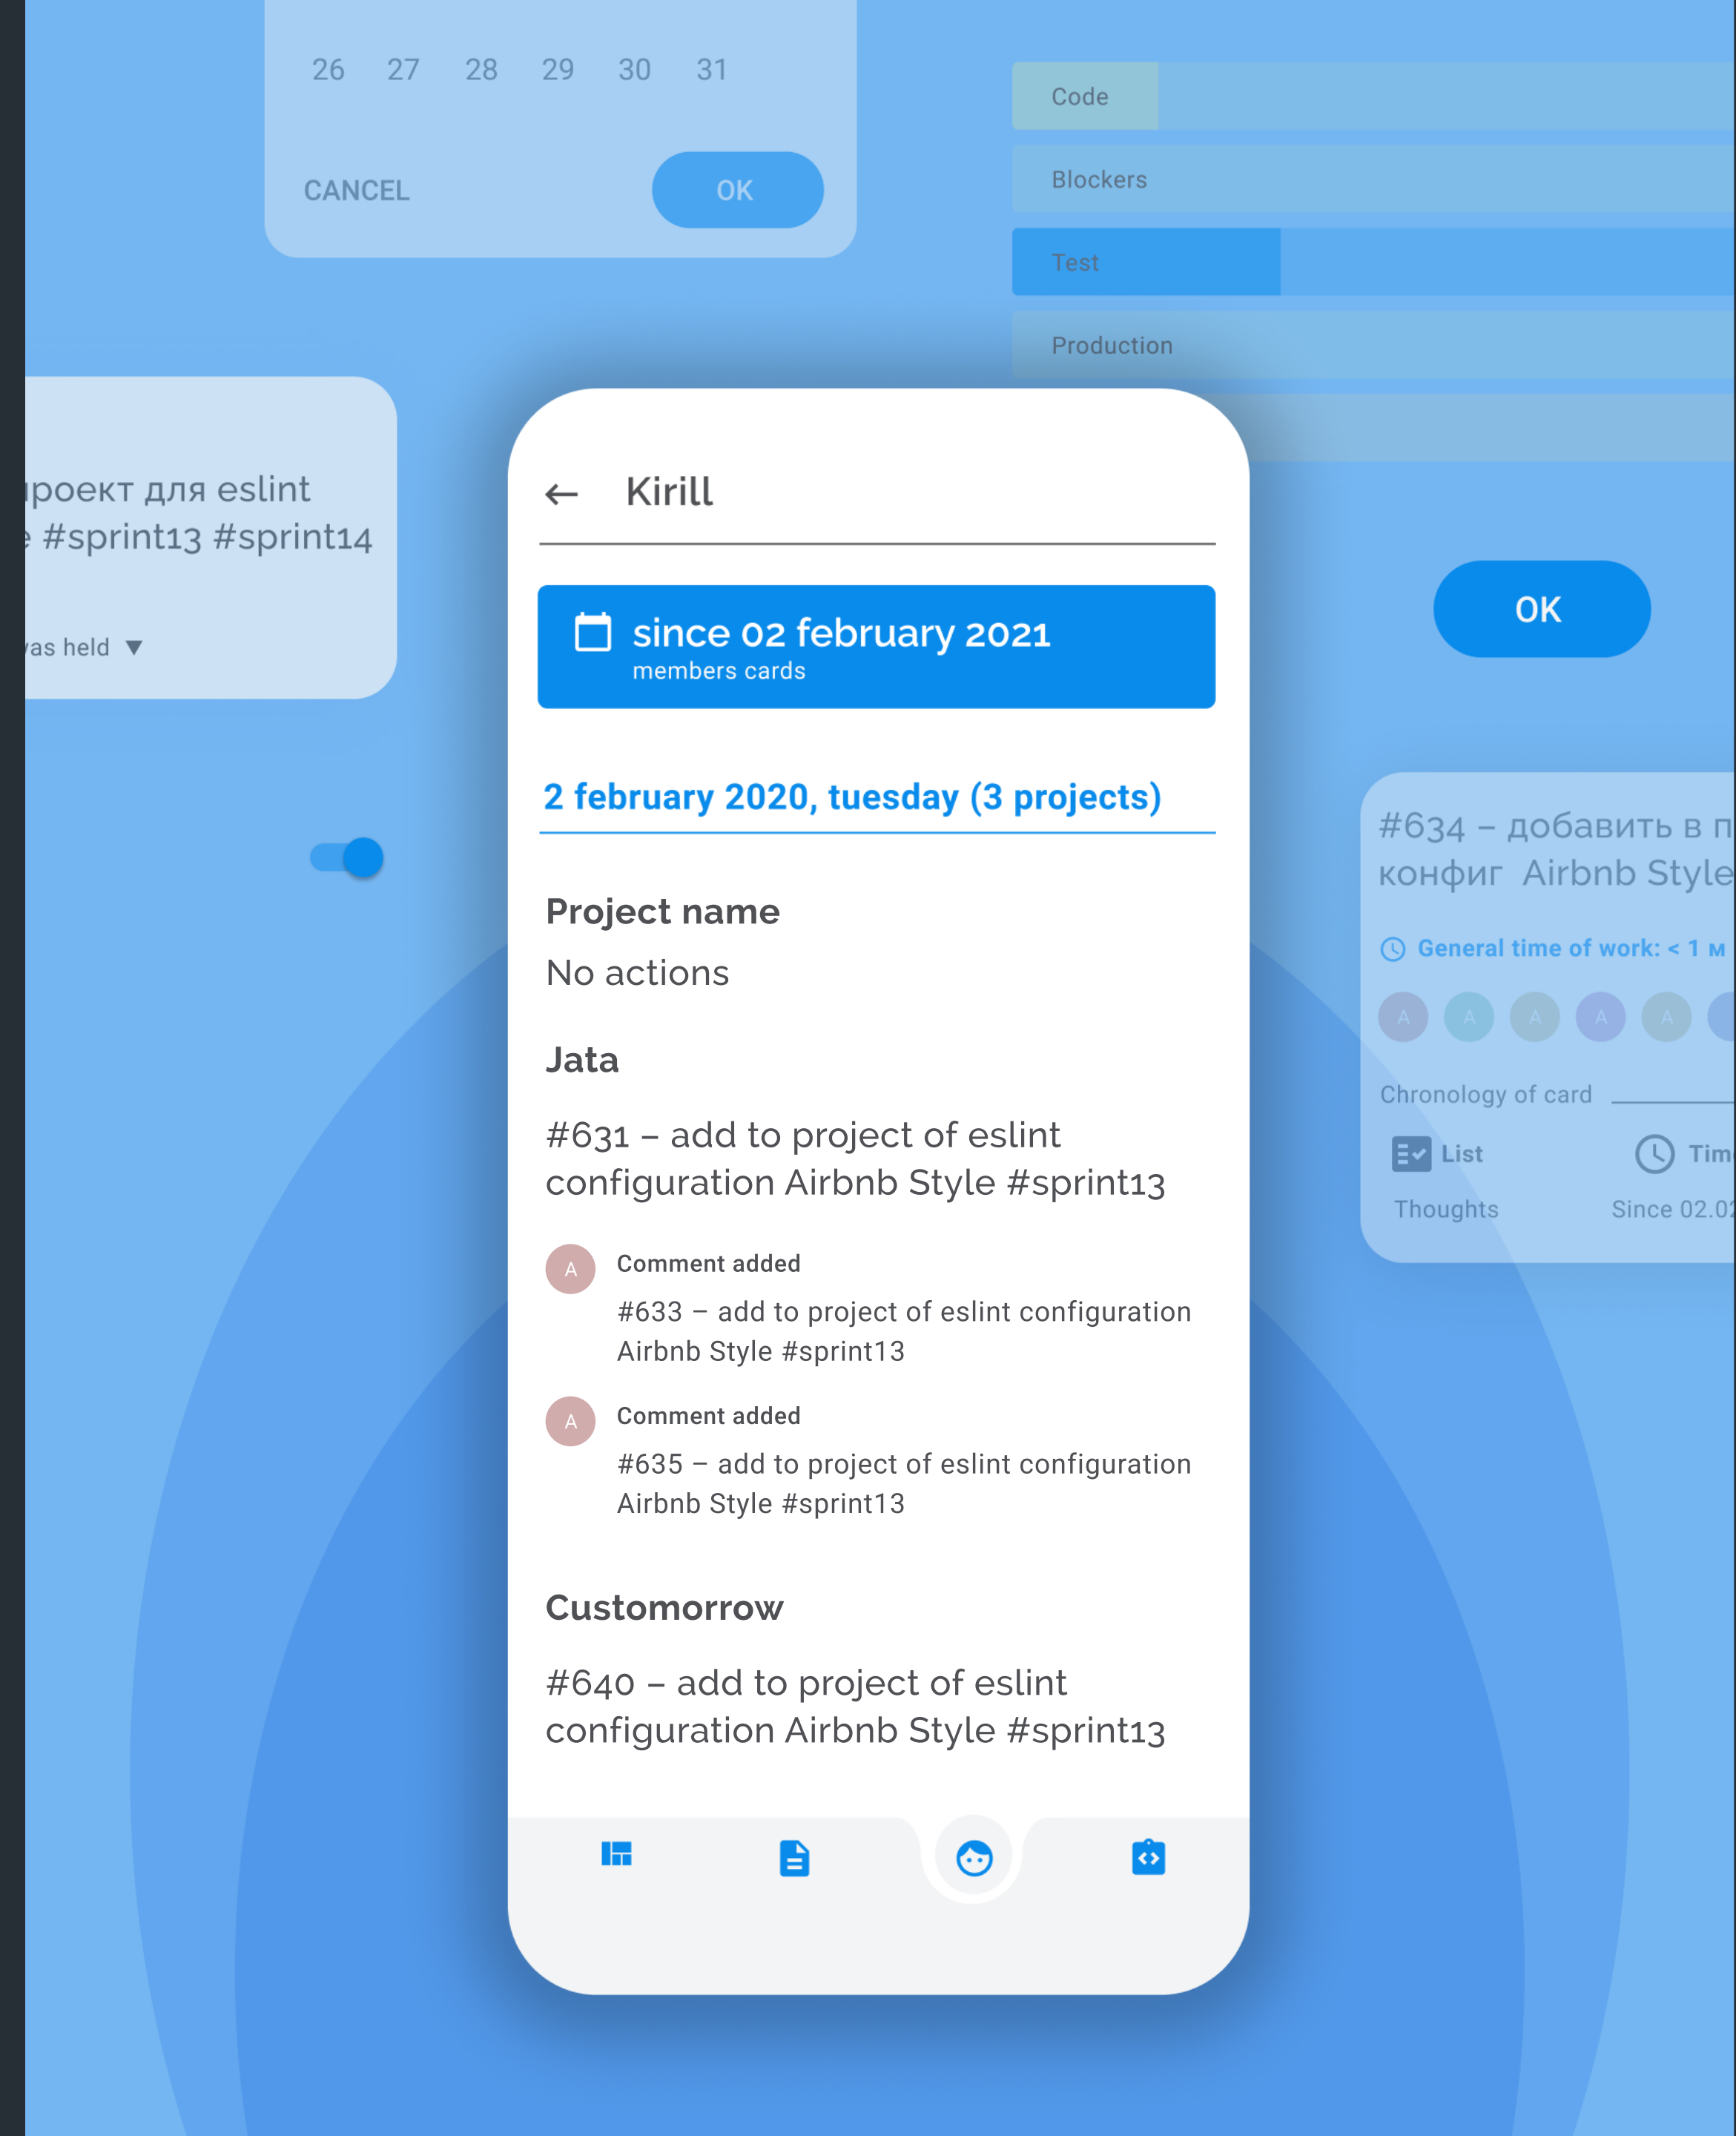

Serves to quickly connect the operator to the client from the widget, installed on the site. Jivosite analogue, only more advanced, for the American market. It was assumed that, as in the web version, the operator can ask the user for the necessary information via «smart» blocks.

TRSTAT

Project management assistant based on Trello. Allows you to obtain statistics on all projects, on all teams, and for each employee in particular. Report for each day, each task. Black and white theme decoration. Authentication via Face Id and Fingerprint.

SMARTSCHOOLPRO

Smartschool is a startup in education and children's health tracks. It is already in use in kindergartens and has sales. The project is needed to monitor and diagnose the physical and mental health of children in kindergartens and to correct children's features development. The platform is also suitable for schools. The stakeholders plan to enter the market of Japan, USA and China.

ONCONA

Oncona is a multifunctional medical system, which provides remote daily questioning of the patient. System is a cloud service. I can keep the illness history, medical conclusions and the monitoring history. Despite the fact that the system was designed with the focus on oncology, it can be customized for any long term monitoring, for example, cardiology or pregnancy tracking.

Добрый день!

Биометрия: Мокр. анализ Дата визита биометристу: 10.08.20

КОРОНАВИРУСНАЯ ИНФЕКЦИЯ				
Название теста	Результат	Ед. измер.	Референтные значения	Комментарий
SARS-CoV-2 (COVID-19)	не обнаружено		не обнаружено	результат

Комментарий врача: Финальный отрицательный результат лабораторного исследования на коронавирус COVID-19 означает карантина мер, если они были рекомендованы Роспотребнадзором.

Для получения консультации по карантинам мерам обратитесь, пожалуйста, в Единый консультационный центр Роспотребнадзора по тел. 8-800-555-4842.

Все рекомендации указаны в соответствии с Методическими Рекомендациями МР 3.1.0169-20 Лабораторная диагностика COVID-19 от 30.03.2020.

Результаты исследований на коронавирус COVID-19 в обязательном порядке передаются в территориальный орган Роспотребнадзора.

Исследование выполнено методом полимеразной цепной реакции (ПЦР) с гибридно-флуоресцентной детекцией продукта амплификации.

Тест-система АнтиСпейд Сов-Вет-FL-45/14 ЦНИИ Эпидемиологии Роспотребнадзора.

Р/У № Р9Н 2014/1987 от 07 апреля 2020 года.

Выполняющий врач: Борушкин Л. С. Дата выдачи: 11.08.20

NDA projects

We work with projects from a variety of fields.
For example, automobile sales automation, medicine,
education, sports (football)

We work with various types of projects, including chat
bots, ERP, business automation, information portals.

Ask in private conversation :)

Payment system

Work on the project is carried out by short iterations - sprints

1

First we estimate the amount of sprint tasks in working hours

2

Then we calculate the cost of the work for one sprint

3

Finally, we take prepayment and start the work

Nonagile (waterfall) projects are estimated with individual conditions

Technology stack

Server: Django, FastAPI, Python, Nginx, Traefik	DevOps: Gitlab CI/CD, Docker, Portainer	Background Tasks: Celery, RabbitMQ	Frontend: Vue.Js, JavaScript, Webpack	Real-Time: Centrifuge, WebSockets, WebRTC	API Gateway: APISIX
Monitoring: Sentry.Io, Datadog	Hosting: YandexCloud, Selectel, VDS.Selectel, DigitalOcean, Vscale, Hetzner	Database: PostgreSQL, Redis, Pgbouncer	Mobile: Flutter.Dev	Auth: Keycloak	Tests: Postman, Selenium, Schemathesis, Pytest
